## EDUCATION

- **Vishwakarma Government Engineering College, Ahmedabad** 2023 – 2027  
*B.Tech in Information and Communication Technology* CGPA: 8.39
- **Shree J.M. Chaudhry Sarvajanik Vidhyalay** 2023  
*Gujarat Secondary and Higher Secondary Education Board (HSC)* Percentage: 81.07%
- **Shree J.M. Chaudhry Sarvajanik Vidhyalay** 2021  
*Gujarat Secondary and Higher Secondary Education Board (SSC)* Percentage: 83.83%

## PERSONAL PROJECTS

- **Articlio – Blogging Platform with OAuth & Dynamic Theming** 2025 - 2026  
*Django 5.2, Tailwind CSS v4, PostgreSQL, OAuth (Google/GitHub)*
  - Built a production-ready blogging platform with OAuth authentication (Google/GitHub), role-based access (Reader/Author), and dynamic theming engine supporting 5 accent themes.
  - Implemented nested threaded comments, reading history with scroll progress tracking, bookmarks, likes, and draft publishing with SEO-friendly dynamic slugs.
  - Optimized performance using Bloom Filter for username validation and session-based view tracking to prevent artificial traffic inflation.
  - Deployed with CSP security headers and WhiteNoise static file caching. Live at <https://articlio-nb11.onrender.com>.
- **BuyCart – E-Commerce Platform** 2025 - 2026  
*Django, Bootstrap 5, JavaScript, SQLite, Stripe API*
  - Built a full-stack e-commerce platform with distinct portals for customers and dealers, featuring product listings, cart management, order tracking, and product reviews with ratings.
  - Integrated Stripe API for secure end-to-end payment processing with a complete checkout flow.
  - Developed a dedicated Dealer Dashboard for inventory management, sales tracking, and rich-text product blogging using the Quill Editor.
  - Designed a mobile-first responsive UI with Bootstrap 5 and implemented Django backend for user authentication and role-based access control.
- **WorkWhiz – Deployed Multi-Role Labour Job Portal** 2024 – 2025  
*Django 5.x, PostgreSQL, HTML, CSS, Cloudinary, Render*
  - Built and deployed a full-stack job portal on Render connecting workers and contractors, with role-based dashboards, job posting, application management, and a rating system for both parties.
  - Implemented secure authentication with email-based password reset (SMTP), profile image uploads via Cloudinary, and a live password strength meter on signup.
  - Integrated Google Translate API supporting 18 regional Indian languages with language preference persistence.
  - Configured production deployment with PostgreSQL (Supabase), WhiteNoise for static files, and environment-based settings management.
  - Deployed live at [workwhiz.onrender.com](https://workwhiz.onrender.com) - accessible publicly with full production configuration.

## TECHNICAL SKILLS AND INTERESTS

**Languages:** Python, JavaScript, basic C, basic Java, basic C++

**Developer Tools:** VS Code, Git & GitHub, Chrome DevTools, basic Postman, basic Figma, basic Linux

**Frameworks:** Django, Bootstrap, Tailwind CSS

**Cloud/Databases:** SQLite, MySQL, PostgreSQL, Cloudinary, Render, Supabase

**Soft Skills:** Time Management, Critical Thinking, Adaptability, Attention to Detail

**Coursework:** Data Structures & Algorithms, Operating Systems, Database Management Systems, OOP, Digital Logic

**Areas of Interest:** Web Development, Full-Stack Development, Backend Engineering, Machine Learning

## CERTIFICATIONS

- **Python Programming Course – Scaler** Completed Apr 2025
- **Micro-Internship – Tata (PowerBI Dashboard Creation)** Completed Apr 2025
- **Web Development Course Completion Certificate - LaunchEd** Completed Aug 2025
